Bethlehem PA 18017-2149

RE: Pennsylvania State Police Incident No. PA 2018-322598
Trooper-involved shooting, Wednesday, March 28, 2018, at
approximately 2105 hours, at the parking lot of Walmart located
at Mill Creek Road, Lower Macungie Township, Lehigh County,
Pennsylvania

Dear Captain D'Ambrosio:

I have reviewed a very thorough synopsis of the above-captioned incident prepared by Lt. Joseph F. Sokolofski, Commander, Criminal Investigations Section (now Captain Sokolofski); I have received briefings from Lehigh County Homicide Task Force Detectives James F. Bruchak and Thomas C. McAndrew; and, I have reviewed certain reports and video of parts of the captioned incident. Further, as you know, I was present at the scene on the evening in question and obtained information as a result of briefings conducted there.

FACTS:

In summary, the facts of this incident are as follows:

On Wednesday, March 28, 2018, at approximately 2105 hours, Ms. Keirre Fichter, of Walmart Loss Prevention, contacted the Pennsylvania State Police Fogelsville Station, and requested that a Trooper respond to the Walmart location at Mill Creek Road because a masked individual was attempting to shoplift items from the store. Ms. Fichter reported that she recognized the individual in question from an internal memo which had been sent out to Walmart associates; and she further advised that she believed the subject had been involved in recent shoplifting

incidents from two other Walmart stores; and, in one such incident had pointed a handgun at a Walmart associate.

Trooper Brian Bird was dispatched to the scene and arrived within minutes. He was in full uniform and operating a marked patrol unit. Shortly after his arrival, he encountered an individual later identified as Aaron Ibrahim, age 26, of Mertztown, Berks County, Pennsylvania, who was wearing a wig and a mask. He was heading toward an exit, having abandoned a shopping cart within the store. When Trooper Bird attempted to stop Ibrahim, he fled and refused to comply with verbal commands given repeatedly by Trooper Bird to "Stop" and subsequently to "Stop or I will tase you."

The foot pursuit followed through the exit and out into the parking lot. As Trooper Bird was continuing the foot pursuit, he was giving the commands to "Stop" and to "Stop or I will tase you" repeatedly. These commands were given at least three or four times according to witnesses in the parking lot. At one point, Ibrahim pushed a shopping cart toward the pursuing Trooper. Ibrahim was heading toward a white Chevy minivan. When he got near the van he reached in his waist area and pulled out a pistol and attempted to fire the weapon. The Trooper reported that he heard a "click". Ibrahim then entered the driver's side of the van and closed the door. Trooper Bird fired nine (9) rounds from his duty weapon, striking Ibrahim eight (8) or nine (9) times, and mortally wounding him.

The "click" sound heard by Trooper Bird would be consistent with the sound of Ibrahim's firearm when the trigger is pulled and the chamber is empty or the cartridge in the chamber did not discharge. Ibrahim's firearm was found on his lap with one (1) round in the chamber and nine (9) rounds in the ten-round capacity magazine. Trooper Bird saw Ibrahim point the gun at him, heard a "click" in an unsuccessful attempt by Ibrahim to fire his weapon and then saw him retreat inside the vehicle. Ibrahim had to have manually loaded the Glock by pulling the slide to the rear prior to expiring. The cartridges for Ibrahim's firearm were analyzed and did not have any firing pin impressions in the primers; thus, there could not have been a cartridge in the chamber at the time the trigger was pulled and the "click" heard.

The Troop M Major Case Team was activated; and Trooper Jordan Houck of the Troop M Dublin Station was assigned as the Lead Investigator. I assigned County Detectives from the Lehigh County Homicide Task Force to assist with the investigation.

Walmart surveillance cameras captured Ibrahim's movement when he arrived outside of, and then throughout the store. He pulled into the parking lot in

a white van at 2045 hours. At 2048 hours he exited the van, got a cart and entered the general merchandise side of Walmart. He was wearing a denim jacket, a silicone mask and a wig. Inside, Ibrahim can be seen pushing a cart through the aisles, through the automotive section, hardware section and then the pet section.

On interview Keirre Fichter, of Walmart Loss Prevention, related that she recognized the suspect Ibrahim from an internally-disseminated email she had received regarding a masked subject who had previously committed retail theft at Walmart stores in the vicinity. She contacted Pennsylvania State Police via telephone and remained on the phone with dispatch while she followed Ibrahim around the store. Fichter observed Trooper Bird enter the store and waived him down, and they then followed behind Ibrahim together.

Ibrahim abandoned the shopping cart he was using and headed toward the exit and exited on the grocery side of the store. The Trooper called out to Ibrahim who then ran out of the store entering the parking lot.

Several other witnesses observed portions of the event outside of the store:

Annmarie Egizio, Chief Adult Probation Officer of Lehigh County, pulled into the parking lot of Walmart a short time before Ibrahim exited. She had observed the Pennsylvania State Police patrol vehicle and then saw a Trooper giving chase. She stated that she heard the Trooper say "Stop or I'm gonna tase you" and that he said that at least three times. She stated that at one point, the Trooper was close to the "bad guy"; and then the gap widened. She heard gunshots, but did not see the shooting incident.

Bruce Charles Fritz related that he had checked out of Walmart and saw a Trooper coming into the store as he was leaving. He soon thereafter heard "stop police, if you don't stop you're gonna get tased". Fritz said that as the guy being chased got near his car, the man reached under his waist area and pulled out a gun. He described Ibrahim as having the gun on his right side and the gun looked to Fritz to be black. The suspect was pulling his gun out with his right hand. Fritz indicated that he didn't see, "...any situation where the Trooper could have done anything different; Ibrahim would not comply and was not stopping."

Mikaela Anderson (10 years of age) said that she walked out of Walmart with her dad and brother at the grocery side of the store. She saw the police car and saw the Trooper running after Ibrahim. She heard the Trooper say "State police, I'll tase you". She heard that stated two to three times. She then stated that she observed the suspect pull out a black pistol when he was near his white van. She says that the suspect cocked the pistol about $\frac{3}{4}$ of the way to his white van.

She observed the suspect and the Trooper running but did not see Ibrahim get into his vehicle. She said she heard a bang, and eight to nine shots.

Trooper Peter DelGaizo, of Troop M Bethlehem and a Pennsylvania State Police SERT (Emergency Response Team), Team Member, related that he responded to the location; and that subsequent to the shooting, he approached Ibrahim's van with a ballistic shield. He observed the driver's side door glass was half broken out. He broke more glass from the driver's side window with his shield, and observed a Glock near Ibrahim's right hand on his lap. He gave verbal commands to Ibrahim and shook him but received no response. He then reached in and grabbed the gun. He turned off the van's engine. He observed that Ibrahim still had a mask on. Trooper James Terry went to the other side of the van and removed the mask. Trooper DelGaizo retrieved and downloaded Ibrahim's firearm. He observed that there was one live round in the chamber. A subsequent check of the magazine removed from Ibrahim's gun revealed nine live rounds in a ten round capacity magazine

The video shows Trooper Bird entering the general merchandise side of Walmart at 2109. It shows Ibrahim abandoning his shopping cart; and at 2110 to 2111 Ibrahim exited the store through the grocery side with Trooper Bird in pursuit. Trooper Bird can be seen chasing Ibrahim to his van, and the lights of the van turn on. Trooper Bird takes a shooting stance where in the vicinity nine shell casings were later recovered. These had been discharged from his PSP issued Sig Sauer 227,G .45 caliber handgun.

Trooper Bird stated that he had been dispatched to a retail theft in progress. The suspect, later identified as Ibrahim, was said to be wearing a mask and taking things. When Bird arrived at Walmart, he observed a female waving him towards her (Keirre Fichter, Loss Prevention) who pointed the trooper toward a cart of items that had been apparently abandoned; and he followed her to the grocery side where she pointed towards the exit and told Trooper Bird "that's him in the hood" referring to Ibrahim. Bird related that he got close to Ibrahim, and said something like: "Hey, hold up." He continued to walk and then jogged toward Ibrahim saying "State Police, stop!" Ibrahim turned briefly, and then he began running. Bird said "State Police, you're gonna get tased!" He observed Ibrahim run over mulch and drop something. He continued to run after him, and then Ibrahim rotated around from his right side clockwise and pointed a gun at Trooper Bird. He heard a click while they were moving toward the suspect's van. It sounded to the Trooper like Ibrahim had pulled the trigger. (Trooper Bird is an Army Infantry combat veteran who served one year in Afghanistan.) As Ibrahim neared and then entered his van, Trooper Bird fired his weapon. He stopped firing when he no longer perceived Ibrahim to be a threat.

When interviewed by investigators several days after this incident (as is customary), Trooper Bird offered further description: while describing the pursuit, he stated, "So he rotates clockwise, draws it with his right hand, points it towards me, kind of close to him so it's not an extended arm, but he points it at me, and that's when I hear it click. Now I don't know if he manipulated a safety or racked the slide, or if he actually pulled the trigger, and it didn't fire, but I heard some type of manipulation of that weapon..."

Then, "He brings it back in front of him. And, I remember grabbing my, my pistol. We're still running. And I remember thinking, it was actually in this tempo, OK, I need to shoot him. ...I remember it's going through my head, OK, I need to shoot him. I remember thinking it's safe to shoot him, there is nobody else around, I didn't see anybody around. ..."

At another point he states, "Well, I thought I was going die. ...he would have probably killed anybody else who was in his way as he tried to escape."

He felt he was in danger and he was in fear for others' safety.

And, finally "I was terrified." "Q. Of what?" "Well, that I might die."

During the course of the investigation, a red wig was observed and recovered outside of Walmart in mulch in a planter over which Ibrahim ran. This is consistent with what Ibrahim was said to have been wearing and seen to have been wearing when he fled the store.

The VIN associated with Ibrahim's van revealed that it was owned by him; however the Pennsylvania registration plate on the van, KHP-1099, came back to a different owner. It was later determined that the license plate had been stolen a few weeks prior to this incident. That victim had reported that his license plate was lost or stolen. The van had white tape over the vehicle make and model name plates on the rear of the van, which would further hinder identification.

The pistol which had been removed from Ibrahim's lap by Trooper DelGaizo was later identified as a Polymer80, model: PF940V2, caliber: .40 S&W. This particular model is sold as a frame that is 80% complete in its manufacturing. The area that holds the fire control mechanisms is completely solid and does not qualify as a firearm under the definition of a firearm according to the BATF. The polymer frame requires some drilling to install the fire control components. The rest of the components, which are not considered to be a firearm, can be purchased without a background check or ATF E-Form 4473 being completed and filed at time of

purchase. In this case the Polymer80 was machined out and fitted with Glock 22 accessories to become a fully functional semiautomatic pistol.

An E-Trace revealed that the firearm had been sold in Texas on March 20, 2018. The investigation revealed that the buyer had only purchased the lower polymer portion (the "frame" or "receiver") of a Glock, without the upper portion and/or any trigger parts. The purchase had been made from Spokane Archery in Washington State. The buyer had filled out an ATF E-Form 4473, as required, for the lower receiver. He had never actually possessed or seen the upper slide or barrel to the weapon. Spokane Archery sells the "uppers" to Glock firearms on EBay. They confirmed that they sold the upper portion of a Glock 22, i.e. the slide/barrel, to Ibrahim on January 28, 2018, on EBay. A purchase record was obtained from the store.

Investigators believe that Ibrahim manufactured his own firearm by purchasing a Polymer 80, possibly on the internet. The origin of that purchase has not yet been confirmed. Firearms experts at the Bethlehem Regional Laboratory confirm the lower receiver was a Polymer 80 which, as stated earlier, was machined out and fitted with Glock 22 accessories.

Ibrahim's criminal history reveals convictions for DUI, a misdemeanor of the first degree; Fleeing and Eluding, a felony of the third degree; Resisting Arrest, a misdemeanor of the second degree; Driving Under Suspension, a summary offense; Theft by Unlawful Taking, a misdemeanor of the first degree; and, Retail Theft, a felony of the third degree. Although he had no conviction for any of the enumerated offenses under the Uniform Firearms Act as adopted in Pennsylvania, (See: 18 Pa. C.S.A. § 6105), he was prohibited from possessing a firearm under Federal law, [See: 18 U.S.C. §922(g)(1)] as "...a person convicted of a crime punishable by imprisonment exceeding one year; ..." Because of that status, he would have been prohibited from legally purchasing a firearm in the United States.

The autopsy performed on Ibrahim revealed that he had been struck eight or nine times. The number is uncertain because one round passed through his upper arm and possibly also into his upper torso. A total of seven projectiles were recovered from his body at autopsy. Ibrahim's death was ruled a Homicide, and the cause of death was multiple gunshot wounds. EMS attempted to help him on the scene, but he was obviously deceased.

During the course of the investigation two other retail thefts which occurred at a Walmart Store in St. Claire, Schuylkill County, Pennsylvania, came to the attention of the investigators of this shooting. On December 22, 2017, a suspect loaded up a cart of merchandise and exited the store, getting into a vehicle which

appears identical to the one observed later at Ibrahim's residence. A suspect wearing an identical mask/wig and possibly the same jean jacket as Ibrahim was wearing on this night, is seen on camera committing a retail theft on March 15, 2018, at the same Walmart in St. Claire, Pa. On that occasion, when confronted by a Walmart Loss Prevention Officer, the suspect pulled a gun from his waist and pointed it at her. There the suspect got into a white van which appears identical to Ibrahim's van here and fled the scene.

CONCLUSIONS:

The above summary of the investigation is not intended to be exhaustive. I have reviewed the report that has been compiled to date together with other evidence, and I commend the Pennsylvania State Police for a typically thorough investigation and comprehensive report. I also commend County Detectives Bruchak and McAndrew for their professionalism in participating in this investigation.

Under the Pennsylvania Crimes Code, 18 Pa C.S.A. §508, a police officer "...is justified in using deadly force only when he believes that such force is necessary to prevent death or serious bodily injury to himself or (another) person ...

"...or when he believes both that:

- (i) such force is necessary to prevent the arrest from being defeated by resistance or escape; and
- (ii) the person to be arrested has committed or attempted a forcible felony or is attempting to escape and possesses a deadly weapon, or otherwise indicates that he will endanger human life or inflict serious bodily injury unless arrested without delay."

Having reviewed this incident and having been at the scene on the evening it occurred, my conclusion is that the discharge of his weapon by Trooper Bird was entirely justified on the basis that he held a reasonable belief that the use of deadly force was necessary to prevent his death and/or the death of, or serious bodily injury to others. This is abundantly clear from the fact that Ibrahim pointed a semi-automatic pistol at Trooper Bird and attempted to discharge the weapon, which he still had in his possession when he entered his van, turned on the ignition and lights and attempted to make his escape. Accordingly, there is no basis to file criminal charges against Trooper Bird as a result of this incident; and, none will be filed.

It is unfortunate that Mr. Ibrahim was mortally wounded; however, it is abundantly clear from the investigation that his actions in failing to comply with the commands of Trooper Bird and in pulling and pointing a gun at Bird and attempting to fire at him, brought about his being shot and killed.

This represents my formal ruling in this matter. I have previously indicated "preliminarily," based on the information which I had on the evening of March 28, 2018, and into the next day, that this shooting appeared to be "justified". **The results of the investigation confirm my preliminary finding. The shooting of Mr. Ibrahim by Trooper Bird was justified.** My investigation is now complete and my file closed. However, should you require anything further, please do not hesitate to contact me.

Very truly yours,

A handwritten signature in dark ink, appearing to read "James B. Martin", with a large, stylized initial "J" and "M".

APPENDIX

AARON IBRAHEM'S FIREARM

As indicated in the report to which this is attached, Aaron Ibrahim was prohibited from possessing (and thus purchasing) a firearm under 18 U.S.C. §922 (g)(1) because he had been convicted of a crime punishable by imprisonment exceeding one year.

The firearm taken from Ibrahim is a Polymer 80 Inc./Glock semi-automatic pistol, model PF940V2/22, caliber: .40. There is no serial number on the frame. The serial number KXC393 appears on the slide/barrel. There was also one magazine accompanying the firearm which had a capacity for ten (10) cartridges.

An examination conducted by Firearm and Tool Mark Examiner, Sergeant Daryl J. Elias of the Bethlehem Regional Laboratory of the Pennsylvania State Police Bureau of Forensic Services, concluded that the pistol recovered from Ibrahim was functional and capable of discharging the type of ammunition for which it was manufactured.

The investigation revealed that only the lower polymer portion of the Glock, without the upper and any trigger parts, was purchased from Spokane Archery in Washington State by a person from Texas. This purchase was legal because the ATF E-Form 4473 (Firearms Transaction Record) had been submitted. That portion of the Glock purchased legally, is referred to as the "frame," or the "lower receiver" of the firearm.

Spokane Archery also sells the "uppers" to Glock Firearms on EBay. The so-called upper is the slide/barrel, here bearing the serial number KXC393. Ironically, this integral part of the pistol may be purchased legally on the internet (EBay) without scrutiny—no ATF form required. It is not considered to be a firearm.

Thus, in this case, Ibrahim as a Person Prohibited to Possess a Firearm could not have legally purchased the frame/receiver. But, he could (and did) legally purchase the slide/barrel on the Internet. It is believed that he then "manufactured" a firearm by obtaining the lower portion (frame/receiver) of the weapon by purchasing a so-called "Polymer 80" on the Internet. That term is derived as a result of the Polymer Frame being 80% of a complete pistol. The manufacturing process can be easily completed by drilling or machining out the holes to attach the slide/barrel, trigger parts, and other necessary parts. All of these can be acquired on the internet. (See example attached.) In this case, the

Polymer 80 was machined out and fitted with Glock 22 accessories to become a fully functional semi-automatic pistol.

I have learned from firearms experts that this is a common practice; and in my opinion, it represents a serious "loophole" that should be closed by legislation at both the federal and state levels. Why permit the purchase of firearm parts without any scrutiny whatsoever by Persons Not To Possess; which they may then easily assemble into a functional firearm?

I intend to forward this report to area Federal and State Legislators in the hope that corrective legislation may be promulgated. It is not my intent to burden persons who may legally possess firearms. However, requiring the filing of an ATF form for all the parts of a semi-automatic pistol does not seem to me to be too burdensome.
